Statement:

Time & Money. I am running for House District 33 to protect your time & money. I need and ask to be your voice.

During the last six years, I been advocating for insurance, education, and statute reforms. I will represent the people's concerns and finish these important issues by effectively working with the House.

Keeping the Capitol, economy, education, jobs, natural resources are all issues that will be protected, funded, educated and grown. We have to review our state budget and cut wasteful out of state spending and see where we can fairly increase revenues.

Alaska has out of state fishing/hunting license, out of state tuition, but no out of state worker tax. As an example I have proposed a non-Alaskan-resident worker tax (10%). The state should not punish residents and reward out of state workers.

I ask that you partner with me. I will fight for your rights and protect against this De Facto federal government.

I have also proposed that Alaska becomes self insured for health, auto, and property insurance. Continuing to send premiums outside is no longer effective or affordable.

Lastly, without justice, we have no laws. our courts are not accessible, or affordable, and justice appears to be based on how much you spend. Our court system and all aspects of government needs checks and balances for justice and accountability to the people. Thank you for your vote.
